[BETTER] Cosmi Shoemaster Qs 10 19. VCF video player Gregg Hoffman VCF (Video for Composers File) format developed by the American composer and sound artist, Gregg Hoffman. This is a more realistic representation of digital audio than the RIFF-based DAB format. It is also more musical. Recent Windows applications that use VCF audio include: Winamp 2.6 and later versions. Windows Media Player 9 (Windows XP or later). Winamp 3 (Windows XP or later). AACenc 5 and later versions (Windows XP or later). Microsoft Windows Media Player version 9.3 and later versions (Windows Vista or later). Not supported by DVD players that use the Region 0 NTSC "standard" in place of the preferred Region 2 PAL "standard". VCF files are longer than RIFF by 1/3. This is primarily due to the addition of extra metadata tags, such as timestamp and a descriptive tag, the audio sample rate, and bitrate. In playback of some programs, a truncated VCF file length is displayed. VirtualDub is free and can open VCF files. The player has a simple visual interface, and it can optionally pre-load an audio clip to play when the user clicks the play button. The Microsoft Windows.NET Framework, as of version 2.0, is able to render VCF files. VCF has the file extension.voc or.vcf. Comparison to competing technologies Although VCF continues to be implemented in all mainstream current and next-generation audio compression algorithms (for example, AAC), VCF has been superseded by newer audio file formats,
