In russian community everyone can read that i wrote here Doa5 Ng3 Noesis Plugin 1 3 Ozip for several hours until i felt comfortable with it. i was afraid that some arabic or chinese person will read my post and think that i dont like them and will start something if this is true. i dont hate arab or chinese people. dont think that. the problem is only because i dont like so many people that try to be so good that they confuse me. btw i already played with the game 4 years ago and really liked it. i forgot that i liked it. i dont have any experience with pr games before so i had to read the manual and the wikis to know some basic things. i tried to look for some flash players or crack or something like this but i couldnt find a good one.. thank .
