Â· Windows7iceextremev2i. Een zoekopdracht van I was able to go into CD mode by pressing Ctrl+Shift+R and selecting "Recovery" on the menu. I tried to install Docker through the Windows 10 Store again after I already had run the uninstall. The Docker 1.12.7 download

---

page does not list Windows 7 as an officially supported OS. In Docker documentation 1.12.7 there is no information on Windows 7 support. . I am running Docker 1.12.6 on a win7 VM with Docker CE 1.12.6 on my Windows 7 OS host. I have also tried on an Ubuntu guest. As I mentioned earlier, I am able to connect to the Docker remote API when I use the Windows 7 docker toolbox. But when I connect to the docker server over the http port (3111) with the same credentials I am using for remote API access, I get a "login attempt failed" error. Command used for getting the registry: `reg query HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\Docker-Docker-Server | find "Docker-Server\Path\to"` Command used for getting the docker server's IP: `ipconfig /all | find "IPv4" | find "Default Gateway"` I have tried both case sensitive and case insensitive searching Also made sure I didn't accidentally click the Docker Logo while

---

running Does anyone have any idea? Why am I unable to login to the remote API even though it is running on the same computer? Is there an environment variable I need to set? A: You should update to the latest version, not just the next version Docker CE 1.13.1 for Windows Docker CE 1.13.1 for Mac Docker CE 1.13.1 for Linux Docker CE 1.13.1 for Windows Server Docker CE 1.13.1 for Mac Server Docker CE 1.13.1 for Linux Server or the stable version Docker CE 1.13.0 for Windows Docker CE 1.13.0 for Mac Docker CE 1.13.
