### Elden Ring Free X64 [April-2022]

1. TACHAE SYSTEM The Tachi system is a unique combo system where players can use their items to create new weapons to create combos. Players can equip a weapon with a different shield, and another weapon. Each of these is an existing weapon with its characteristics improved, called an “Equivalent weapon.” Players can learn to replace their weapons with Equivalent weapons, and use the Tachi System to grow in their fighting ability. A Tachi is a weapon that appears within your inventory at times when you activate Tachi Mode (TECH-mode).

In the future, when we have better understanding of the mechanisms of MMO games, we plan on developing the use of trading systems for crafting items or as a part of certain game events that involve the use of a Tachi System. Players will still be able to buy and sell items at game shop after launch.

**2. EXPLORE AND ADVENTURE** A vast world where a vast variety of natural beauty and a large number of dungeons are available. Players can learn from the strengths and flaws of their characters' equipment to improve their skills.

**3. MULTIPLAYER**

1. Local Area Multiplayer
2. Online (A players' activity is shared with other players)
4. Network (Online play with players from other regions)

The local area features what we call "Local Play" (CLOSED GAME). In a local play, a player chooses a

---

map and characters, and can enter the game. In addition to this, we will support the actual form of the game that players can create their own game servers or play with other players' activity with the "Social Play". The social play allows you to play the game with other players who are playing on our servers. 5. STRATEGIC ABILITY Through an evolution of the Tachi system, we have implemented the strategic ability to increase the number of attributes of an Equivalent weapon. Players can learn to combine their weapons so that they can enhance their combat ability and use their blades to to protect allies. We wish that our game be the
