(CNN) Larry McWilliams, a sheriff's deputy in Montana, was killed Monday when his patrol car hit a power pole, police said. Larry McWilliams, 41, was helping a third-party with an apartment search when his patrol car collided with a power pole Monday morning in Shelby, outside of Butte, Montana, police said. "To say that he was involved in the search would be a major understatement," said Clinton Natapoff, a brother of Larry and godfather to his three children. "He was a very good, outstanding officer. He did everything he could to serve the public." McWilliams

We sought to develop a desensitization protocol for treatment of allergic asthma in adults to allergens such as house dust mite and cockroach. We evaluated the effects of recombinant human interleukin-4 (rIL-4) in nine adult asthmatic subjects before and after four months of desensitization. Subjects underwent skin prick testing and baseline pulmonary function testing. All subjects had positive skin tests to house dust mite and cockroach extracts with a mean wheal diameter of 4.9 +/- 0.3 mm and 7.1 +/- 0.6 mm, respectively, and with specific IgE concentrations of greater than 10 kU/L. Subjects were desensitized to house dust mite and cockroach extracts by three monthly intradermal injections of the extract and the following intradermal dose of 0cc13bf012

A survey of 2680 bivalve molluscs harvested from 627 German coastal waters between 2004 and 2007 showed the presence of 142 Aeromonas species and strains. Twenty-five species were isolated from 4 bivalve orders (Pteriida, Velutina, Venerida, and Unionida) and 4 different genera (Ampullina, Aulacomya, Planorbidae, and Truncatellina). A new genus, Melongena, is proposed to accommodate a range of pigmented, oxidasepositive, Gram-negative aerobic or facultatively anaerobic bacteria. Aeromonads are widely distributed in marine environments, and high rates of isolation from bivalves, mussels (Mytilus edulis L.), and oysters (Crassostrea virginica Gmelin) have been reported. The taxonomic identification of isolates was performed by 16S rRNA sequencing, phylogenetic analysis, or both. Identification to the species level was based on API 20E/20NE analysis, API 20E test, and positive reactions in the oxidase test. The present study showed that the most frequently isolated species from b
