All known cancer cell lines derive their power to proliferate from genetic alterations which confer new traits to the cells. Some of these alterations may contribute to the transformation or tumorigenesis of the cell and others may contribute to its malignant behaviour. The repertoire of genetic alterations which induce these changes is in part encoded in the genome of the cell. This genetic information is distributed in the form of DNA and is

New: 17BIT. SoftwareGames & Entertainment Grand Theft Auto 5 : GTA 5 is a video game developed by Rockstar North and published by Rockstar Games. It was released for the PlayStation 3 and Xbox 360 in October 2013 and for Microsoft Windows in September 2014. The fifth major installment in the Grand Theft Auto series, it is the first title in the series to be developed for next-generation consoles, the PlayStation 3 and Xbox 360. ReviewsUnder the hood, Rockstar reveals that Grand Theft Auto V is based on a new in-engine rendering engine called Rockstar's Image-Based Lighting (R.I.B.L.), which allows them to create more detailed, realistic images with less graphical compression. The developers also used a ray tracing system to assist with reflections and shadows. Grand Theft Auto V also has significantly improved physics and player control. New mechanics include player controlled foot traffic, a detailed damage model, the ability to use vehicles as weapons, weapons that are fired from melee range, and player customisation via the 'Vanity System'. Notable changes include a noticeable graphical upgrade, while aspects of the in-game setting of Liberty City (such as new vehicles, pedestrians and buildings) are also updated for the game, with Liberty City having many improvements from previous titles in the Grand Theft Auto series. The game is available in three different editions, with different included game content and post-release support, including 'Game of the Year' editions, a special edition that contains a statue of Franklin Clinton, and a special edition with a bonus disc that contains a virtual tour of Liberty City in the game and behind-the-scenes interviews with the development team. The additional content included in the Grand Theft Auto V: Episodes from Liberty City packs includes three stories, 'The Lost and Damned' (an expanded version of the game's introductory 'The Lost and Damned' mission), 'The Ballad of Gay Tony' and 'The Ballad of the Campiest Chipmunk Ever'. They consist of nine missions and are playable in either single or multiplayer, and have a new character, Sticky Fingaz. Additionally, gamers can download a playable demo of 'The Ballad of the Campiest Chipmunk Ever' on the PlayStation Store for free. Rockstar Games released the original Grand Theft Auto V on 13 September 2013, two weeks before the second part of the episodic campaign. Grand Theft Auto Online is a multiplayer-only mode of Grand Theft Auto V, released for the PlayStation 4

ing is "Secretshopper" Doug Cerrillo's Intriguing, Icy Collection Only a few minutes after landing at the airport in Delaware on a sweltering sunny July afternoon, my ride into New Castle is an imminent Corvette, which slows down for me but will not drive between airport lanes--(the local cops, no doubt tipped off by its exclamation of service and a peppy-sounding exhaust, are eyeing it.) Built in 1953, it's sandwiched between a neon "Naval" sign and the lines of the nearby Bell Helicopter factory and sits with perfect air-conditioning--a hint of the immediacy of the day's date. I am in no hurry to leave the car, though riding with a monstrous radiator fan, which shoves hot air down into the cavernous back cavern of the shell. I buckle myself into the front and savor what promises to be a cramped ride, the window less than a foot from the occupants' faces, space barely adequate for a lap. I am packed with odd odds and ends, copies of Star Wars, X-men. Peeking through the cracks in the dash, gears rattle as they make their way around. It snatches my meager luggage, however,--a wide, white case for my computer and a black canvas/leather bag with my computer accessories stuffed into its open top and a couple of sweaters and T's folded and packed for trips to hide in. I spend the remainder of the ride lined with my accessories, pulsing with the innocence of youth. There is no window, so, I try to conceal an awareness of the fit of my new T-shirt against my new shorts, by peering out of the top. I slowly assemble my knowledge of the collection in my head for the first time. The builder, Doug Cerrillo, is a Formula 1 racer, enjoys hidden backgrounds and a steady stream of video cameras, races and records vintage cars and flies as part of the DelStar Flying Circus. He's a frequent player at the MoBoGallery in New York, where he at least half-regularly possesses at least four cars on his own floor. In addition to the occasional strange car like this one, there are also a half-dozen vans and trucks he drives to satisfy desires only he can fathom. Doug is one of the few people I know who gets paid to play with all these toys. He very recently had 20 minutes with the Hollywood Motor Car Collection--a city block
