Introduction to the Game

Tom Clancy and Gary Gygax established the planet of Krynn in the mid 1980s. The setting contains hundreds of fantasy races and gods. Two authors succeeded in describing that world for you in a coherent, continuous way in seven novels. The first six are great action-adventure novels, which can be easily read in a couple of evenings. But the seventh one is a bit too complex. The first part of this series is thus known for a lot of concepts and technical details.

LoCo is similar to other turn-based battle game in RPG Maker i.e. the players on opposite sides roll the dice and can select a weapon for their units. The story line consists of 30 missions that you have to complete in order to save Bruma. Bear in mind that the first part of the game is the hardest because every unit is associated with the cutiest of the characters. You might find it a bit unfair if you ask me, but at least the first time you face one of them, you will certainly have a strong affection for that character.

LoCos objectives are to collect 6 souls and to convert them to a mighty soul cube. The souls can be collected in the dungeon of the Capital or in the abandoned fortress of the Old Ones. The dark side of the moon is surrounded by a protective barrier that an armed group of bandits tries to break. It is the game's baddies.

Please note that the goal of LoCo to rescue the baby. You will fight countless of baddies and monsters in the dungeon of the Capital. In order to search for the baby, you will have to deploy various types of heroes to that area. The first part of the game will be hard only if you do not manage to find some of these heroes. You can easily waste dozens of time trying to use a previously useless unit. You shouldn't do

What's new in Zero Point:

Zero Point in the south bank of the river, that is along the 3rd manastir under Dvino je na jeprom, above Krojača, on is wierd looking space next to a steel bridge, Nizottef lake. It is called Zero Point Zero Point and No Name, but I've seen it signs "deconstruction object, an object of complete waste, a " Nice spot, enjoy. Yes, it still exists, no one has bothered with it since the 80's, when Kappelmann made her show in Prague. It was taken over by a company headed by a guy called Volker, a German who opened a disco near the south bank of the Vltava (the side where the bus station is and the direction we're driving) on a barely not as ugly square called 'Prague 21'. Two years later, when Nizotte's show came around, he opened his concert on that site, too, with the only difference that he put a little (bizarre) stage on top, and just one huge mirror to transfigure the space into a theater. Nizotte used it a year later for his concert with Sledgehammer. His name is still written on it nowadays, but it's of no use since those walls don't hold anymore. Luckily for you (and me for that matter), a movie called "Land of Plenty" came out last year, making fun of this show. Cool film. hey guys,does anyone know about a sculpture called horizontaal? i have heard that it's something to do with bees, but i don't know what i heard, was it it was right around the 80's maybe? and is it still there? I don't remember it. But I don't know were you may find more info on it. Re: ZERO POINT ZERO POINT in Prague I saw it long time ago as a small shabby house what you find during reconstruction work near the O2 arena. The memories from old San Saba music festival all the way back to the 70's are totally healing to me ;-) Re: ZERO POINT ZERO POINT in Prague I saw it long time ago as a small shabby house what you find during reconstruction work near the O2 arena.
