Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. Roblox was partially based on an Australian company, Lime Group, which ceased operations in 2013. Let me start by saying this game is extremely annoying and difficult. I hope this post will be useful to you. and if you are stuck on level 25-30, know that you can make waves. The wave you should play is the Wave 2 of the Red Sweater. This wave is at level 24, but you could get to level 32 for a maximum of waves. Waves can be made by making a 3 or more combo without breaking any of the borders. Do this for a wave. You can also make a bubble by bouncing off someone else's wave or a combination of Bubble

Bullets. The Bubble Bullets you do can have different damage, either one color at a time or two different colors at the same time. If you see an enemy that has a border, you can destroy them before they actually get their border. You do this by doing a certain number of hits that depends on the enemy and your current level. The border enemy has a series of numbers on it that correspond to the number of hits you would get when you hit them. For instance, the Border 10 would give you 20 hits, the Border 15 would give you 30 hits, and so on. The higher the number, the more damage you will deal. You get more damage for hitting them by a border or a bubble than hitting them in the normal way. To destroy the border enemy, use your Blast to destroy it.
