Learn SAP ABAP Programming in 1 Day[The Journey from Beginner to Advanced]Q: How to do join across 3 tables I have 3 tables in my database : 1- Test: +-----+-----+ | id | question | +-----+-----+ | 1 | What is test? | +-----+-----+ 2- User: +-----+-----+ | id | email | +-----+-----+ | 1 | user1@mail.com | | 2 | user2@mail.com | +-----+-----+ 3- Answers: +-----+-----+ | question | answer_1 | answer_2 | +-----+-----+ | 1 | answer_1 | answer_2 | +-----+-----+ How can I get the answers by the first or second name of each User. For example, if I ask "What is test?" I should get answers like: +-----+-----+ | name | answer_by_user | +-----+-----+ | user1@mail.com | answer_1 | | user2@mail.com | answer_2 | +-----+-----+ My current query is : SELECT answers.*, user.*, test.question FROM answers INNER JOIN user ON user.id = answers.answer_1_id INNER JOIN test ON test.id = answers.test_id But I get result like this: +-----+-----+ | name | answer_by_user | question | id | +-----+-----+ | user1@mail.com | answer_1
