Q: is there a way to create a custom object of a generic type? so i got a class public class foo and i want to create a object of this class, and keep it in a list. so i am trying this: foo bar = new foo(...); is there a way to create this as i don't really know the type of T.

A: If you declare your class like this: public class Foo { public T createFoo(...) { ... } } you can new up an instance of Foo. You don't need to know the type of the T at the time you create the Foo object.

Rosenbloom told NBC Out that she wants to see more vegan foods and products on store shelves. The organization aims to make vegan options more accessible in the grocery stores, restaurants, stadiums and other facilities that have large number of clients or employees who are looking to shift their diets. “We also want to try to bring attention to the ways in which vegan restaurants are opening and are able to create a truly vegan experience,” Rosenbloom added. The public’s increasing interest in vegan diets can be seen in recent food trends. Vegan food is taking center stage at festivals and festivals of every kind, and consumers are increasingly willing to pay higher prices for vegan options.
