ISBN: 0231149746 005.1. Business Statistics By J K Sharma Free Pdf. Statistics For Management By Jk Sharma. A Case Study - eBook From hindustan.Q: Operating on multidimensional arrays I'm creating a science museum where visitors can buy tickets to watch an activity. Each activity will have a fixed price and a random time of display. I can get the time of display for each ticket by multiplying the time and the price and adding the hours of the time and the days of the week. Once I have a list of time and prices I can calculate the minimum number of tickets needed to buy. def ticket_min_needed(time, price): minimum = [] for x in range(len(time)): c6a93da74d
